

UNDER THE MOON

(letra y música: Jorge Salán)

www.jorgesalan.com

The night wind strongly blows in the storm, in the storm
Now tempt me, lie to me, magic woman break my soul
So high, till the story ends, through my hands, through my knees
I don't want to stop no more.

You gotta take me a little higher
I'm going to touch the sky
This night won't last forever
Can't you read my mind?

You know you have to make it
To make me all your own
Where I'm from is so far away
Soon I'll be gone
But thanks for your attention
I've walked a thousand miles just to feel all your love
And under the moon
I will see it shining through

Day to day
Approaching every moment
Here and now and eclipsed by the circumstances
I just want to feel your warmth again
While outside the city sleeps away

So take me a little higher
I want to see the light
Another day will dawn and we won't have this chance

You know you have to make it
To make me all your own
Where I'm from is so far away
Soon I'll be gone
But thanks for your attention
I've walked a thousand miles just to feel all your love
And under the moon
I will see it shining through

Now tempt me, lie to me
Now make me high

So take me a little higher
The distance will part us
And we'll forget each other with the passing of time
